EIT RIB Poland 2026/27

Participation Confirmation & Consent Note

Company legal name: [.....]

Registered address: [.....]

KRS / registration number: [.....]

Call reference: EIT RIB Poland 2026/27 — version/date: [.....]

Published Call link: [.....]

On behalf of the company identified above, we confirm acceptance of our invitation to participate in EIT RIB Poland 2026/27, coordinated by EIT Health e.V. on behalf of the EIT Community Regional Innovation and Internationalisation Cluster.

1. Support and acceptance of the Call

We have read and accept the Call identified above. The programme provides online support: a two-hour mentoring and action-planning session followed by at least 20 hours with a matched sector- and market-relevant mentors/Buddy, for one of your chosen target market in Spain, Germany or the Nordic countries. This programme provides only non-financial support: no participant grant, payment, travel or accommodation funding, or reimbursement is provided. We acknowledge that the participation of RIB Poland does not guarantee contracts, market entry, investment or admission to another EIT Knowledge and Innovation Community (KIC) programme; each KIC retains its own award and investment decision-making process.

2. Eligibility, representatives and conduct

We reconfirm that we meet the Call's eligibility requirements and that our application information remains accurate. We will promptly notify EIT Health of material changes or potential conflicts of interest and act professionally and respectfully. We may nominate up to two representatives; our CEO or senior manager authorised to decide on market-entry priorities will attend the initial two-hour session. Participation is granted to our company and may not be transferred to another entity. Changes to representatives will be notified to the programme team.

3. Participation and simple programme records

We will attend agreed sessions and cooperate with our mentors. We will provide the initial Mentoring Planning Action Plan after the planning session and a short communications and dissemination plan within the Call's stated deadline. We will prepare and confirm with our Buddy a short mentoring record/report covering the full programme period and support delivered, and submit the Final Action and Market-Entry Summary within 10 working days after mentoring ends, together with participant feedback. We will provide a short, non-confidential outcome update if requested six months after programme completion and relevant information for proportionate programme checks under the Call for up to five years after completion. For the avoidance of doubt, these are participation and impact records, not grant-cost or financial reports. (For the full list of expected deliverables, please see section 2 of the RIB Poland Call Document, Project deliverables).

4. Confidentiality and intellectual property

We will identify information that is confidential and protect confidential information received from organisers, mentors or other participants. Such information may be used only for agreed programme purposes and must not be disclosed without the owner's permission, unless required by law. We retain ownership of our pre-existing intellectual property. Participation does not by itself transfer IP ownership. We may apply the learning to our business while respecting third-party rights and restrictions on distributing training materials.

5. Programme data and privacy

We authorise EIT Health to use relevant company information for programme administration, mentoring and monitoring, with access limited to authorised delivery staff and assigned mentors/experts who need it and are bound by confidentiality and data-protection obligations. Personal data will be processed in accordance with the GDPR, applicable Call provisions and privacy notice. We will supply personal data only where entitled to do so and inform our representatives of the privacy notice. This authorisation does not permit onward referrals to other KICs, partners or investors.

Privacy information: eithealth.eu/privacy-policy/ | Data rights: dataprivacy@eithealth.eu

6. Optional onward opportunities

Before any onward referral to EIT KICs, we will be asked to confirm the named recipient, specific purpose and exact non-confidential profile, deck and contact details to be shared. Referral does not guarantee further support. Declining or withdrawing interest does not affect participation in this programme.

☐ We would like to be contacted about relevant onward support opportunities. *Optional; this box does not authorise data transfer.*

7. Communication and visibility

We commit to displaying the EIT Community logo on our company website within one month after programme completion and will acknowledge EIT RIB, EIT Community and EU support in programme-related communications in accordance with the branding guidance supplied for this edition. We will notify EIT Health before programme-related communication or dissemination and will not publish confidential information without permission.

8. Withdrawal or suspension

We will promptly notify the programme team in writing if we wish to withdraw or cannot continue. EIT Health may suspend or end participation for ineligibility, materially false, misleading or incomplete information, material breach of the Call conditions or this note, serious misconduct, or circumstances outside its reasonable control that prevent delivery. It will give written reasons and explain any applicable procedure, in line with the Call. No recovery of participant funding applies, as no participant grant is paid.
